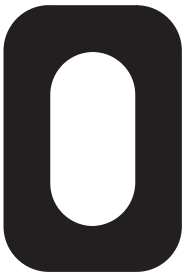
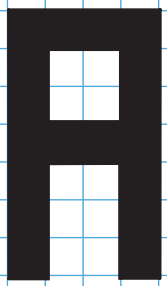
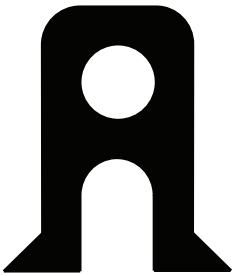
Book published and edited by the author

MACHINA is a serif Font composed by modular and repetitive elements. The idea for realization of this Font was born through the observation of images of the first printing presses; in fact, they were composed by modular elements both in the machinery (screws, gears, plans, etc) and in the blocks that contained the single typeface. The combination of these elements generates a complex machine but, at the same time, easy to use. In the next pages you can also view the grid.







Pang

A Pangram is a short sentence using every letter of the alphabet at least once.

gram

Is used to test the graphics performance
of the Font.
